

And the Augusta Chapter NECA

Present

How to Use Stockmen and Non-Electrician Help

March 23, 2012

8:30 am – 4:00 pm

Holiday Inn Gordon Highway

2155 Gordon Highway

Augusta, GA 30909

(706) 262-6322

Fee: \$295 Online Registration / \$305 Paper \$400 Non-Chapter Members

The stockman, material handler, or other similar classifications such as Construction Wiremen/Construction Electrician are being used more and more on electrical construction jobsites. Although these workers are less technically-trained than electricians, they can have a significant impact on job profitability and productivity by reducing composite crew cost and reducing time that multiple electricians spend handling material and other non-technical activities. Participants will learn the impact of the usage of stockmen and other labor classification on jobsites, if used effectively. They will learn how to identify activities in the project planning phase in which the stockmen and other help can be involved to reduce material handling. They will also see examples of usage and opportunities for usage of stockmen, and finally how to track the impact of stockmen usage on job productivity and use the tracking to improve their estimates. This course is led by **Dr. Perry Daneshgari**, Adjunct Professor at the University of Michigan.
