

And the Chicago & Cook County Chapter, NECA
Present

Improve Profits by Reducing Labor Risk

September 11, 2009, 8:00 am – 5:00 pm

Sofitel Chicago O'Hare
5550 North River Road
Rosemont, IL 60018

Registration Fee: \$385

Reduction of labor risk has helped many other industries to reduce cost and improve productivity. By controlling variation in aspects of their work, other industries have been able to reduce labor risk and stay competitive against international low cost producers. By monitoring and controlling variation in a few small areas of their business, contractors can reduce their labor risk and costs, become competitive and become low cost producers. This course will enable participants to identify the sources of variation in their profits; select the methods that will reduce variation in operations; create management tools to continually improve predictability of labor and management; create a labor risk management methodology; and improve how the company appears to lending and bonding companies. This workshop is led by **Dr. Perry Danesghari**, Adjunct Professor at the University of Michigan. He has extensive background in improving productivity and profits in various industries.

Name _____ Job Title _____
